

Oscar Festo Kimenyi

Full Stack Developer

☎ +255 683 445 527 ✉ oscarkimenyi49@gmail.com 🔗 linkedin.com/in/oscarkimenyi 🌐 github.com/oscarkimenyi

Professional Summary

Full Stack Developer with hands-on experience building scalable web applications using React, Node.js / Express, MySQL, and MongoDB. Skilled in RESTful API design, JWT authentication, role-based access control, and integrating machine learning models into production systems. Strong foundation in IT infrastructure, networking, and DevOps practices ensures reliable and maintainable deployments. Committed to writing clean, modular, and well-documented code.

Technical Skills

Frontend: React.js, Next.js, JavaScript (ES6+), HTML5, CSS3, PHP

Backend: Node.js, Express.js, Laravel, RESTful APIs

Mobile Development: React Native

Databases: MySQL, MongoDB, PostgreSQL, SQLite, Supabase

AI / ML: Python, Scikit-learn, TensorFlow, NumPy, Pandas

DevOps & Tools: Git/GitHub, Docker, Netlify, Vercel, Render, AWS basics, Insomnia

Security: JWT, Role-Based Access Control (RBAC)

Projects

Customer Churn Prediction Web Application

- Built ML-powered web system integrating Flask/Scikit-learn backend with Node.js services
- Implemented asynchronous model training pipelines using Celery + Redis
- Designed secure JWT authentication with admin and manager role-based access
- Developed interactive analytics dashboards, automated email alerts, and PDF report generation

E-Commerce Web Application

- Designed and developed full e-commerce platform including user auth and product catalog
- Built secure RESTful APIs for users, products, orders, and transactions
- Created responsive React frontend with dynamic rendering and cart functionality

Inventory Management System

- Developed full-stack inventory system with real-time stock tracking and low-stock alerts
- Designed and implemented REST APIs using Node.js + MySQL
- Enforced role-based access control for multi-user warehouse environments
- Containerized MySQL database with Docker for consistent development & deployment

Escrow Shop — Full-Stack E-Commerce Platform with Escrow Payment Integration

- Built a full-stack e-commerce platform using React.js, Node.js, Express.js integrating Escrow.com's API to securely hold payments in escrow until buyers confirm receipt of goods.
- Implemented a protected checkout flow with real-time transaction creation, webhook handling, and sandbox-to-production configuration.
- Deployed React frontend on Vercel and Node.js/Express REST API on Render with CORS-secured cross-origin communication.

Incident & Operations Log System

- Built a full-stack incident management system using Laravel, React.js, and MySQL with a structured status workflow for tracking and resolving incidents
- Implemented role-based access control (Admin, Operator, Reporter) using Laravel Sanctum and REST APIs to secure endpoints and UI access
- Developed an audit trail and activity timeline feature using Axios and MySQL to log status changes, comments, and assignments

Hotel Management System

- Engineered comprehensive system for bookings, guest records, and payment handling
- Designed REST APIs supporting room availability, reservations, and maintenance workflows
- Implemented multi-role authentication (admin, manager, staff)

Professional Experience

Full Stack Developer – Independent Projects

2023 – Present

Self-Directed

- Designed and built multiple production-grade full-stack applications (MERN + MySQL stacks)
- Developed secure, modular backends with authentication, authorization, and clean routing
- Integrated machine learning models into live web platforms for practical use cases
- Utilized Git/GitHub for version control and project documentation
- Applied Docker for consistent environments across development and deployment

Full Stack Developer Intern

Jan 2026 – Feb 2026

Codveda Technologies – Remote

- Built a full-stack Student Management System using Node.js, Express, MongoDB, and React.js (MERN).
- Developed REST APIs, authentication, and responsive frontend interface.
- Implemented secure data handling and database integration.
- Deployed Frontend in Vercel and Backend in Render.
- Utilized Git/GitHub for version control and project documentation

Web Application Developer

July 2023 – Sept 2023

Mwanza City Council – Mwanza, Tanzania

- Designed and developed a full web-based application system that enabled university students to apply for practical training placements online, replacing manual paperwork with a centralized digital platform.
- Built a responsive frontend using HTML, CSS, and JavaScript, and implemented backend logic integrated with a MySQL database to manage student records, applications, and status tracking.
- Implemented form validation and structured data handling to ensure accurate submissions, improve reliability, and enhance overall efficiency of the application process.

Software Development Team Member

July 2022 – Sept 2022

University of Dodoma

- Contributed to Prison Management System (HTML, CSS, JavaScript frontend)
- Collaborated on module design, frontend implementation, and usability enhancements

Certifications

- **Full Stack Developer Certificate – Codveda Technologies (2026):** Completed 8 tasks which strengthened my skills and ability in API development, Database Integration, Authorization & Authentication.
- **TTCL Telecommunications Infrastructure Certificate – Tanzania Telecommunications Corporation (2024):** Completed the practical training with wide experience and exposure to Switch and data communication, Access network, Radio and transmission and Power plant and air condition.

Education

Bachelor of Science in Software Engineering

2021 – 2025

University of Dodoma

Graduated: 2025
